

Krishna Khandelwal

Data Analyst

krishnakhandelwal2001@gmail.com | +1 8488449148 | NJ, USA | Portfolio | LinkedIn | GitHub

SUMMARY

Data analyst skilled in translating complex data into clear, actionable insights. Proficient in SQL, Power BI, Tableau, and data visualization. Currently exploring AI and machine learning to enhance data-driven decision-making.

PROFESSIONAL EXPERIENCE

Monmouth University, Graduate Data Researcher

10/2024 – 05/2025 | NJ, USA

- Scraped and integrated data from 10+ global environmental sources, compiling a dataset of over 250,000 records spanning 15 years on AQI, temperature anomalies, and natural disasters.
- Analyzed 10,000+ news articles using BERTopic and VADER to extract sentiment trends and misinformation signals across major climate events.
- Built and validated RNN/LSTM models achieving 85%+ accuracy in forecasting climate risk indicators and sentiment shifts over time.
- Delivered an interactive dashboard and data visualizations used in 3+ academic seminars to inform policy discussions and support data-driven climate strategies.

Real AI Dynamics, Technology Developer Intern

06/2024 – 08/2024 | Las Vegas, USA

- Integrated the CoinMarketCap Public API using Python to fetch, process, and analyze real-time cryptocurrency data, enabling insights into market trends and supporting data-driven decision-making.
- Contributed to an AI-driven HR Automation project by using ChatGPT to analyze and rank over 1,000 resumes per job posting, provide candidate recommendations, and generate personalized feedback, improving recruitment efficiency and accuracy.
- Utilized Power BI to analyze and visualize client data, extracting key insights that enhanced business strategies and optimized recruitment processes.
- Fine-tuned a GPT-4 model using over 10,000 resume datasets from Kaggle and developed a CLI chatbot to evaluate and critique uploaded resumes, enhancing the accuracy and effectiveness of candidate assessments.

PROJECTS

FedNLP: Analyzing Federal Reserve Meeting Minutes with NLP Techniques

03/2025 – 05/2025

- Scraped and analyzed 128 FOMC transcripts (2015–2025) using spaCy, LDA, BERTopic, and FinBERT to trace sentiment and topic evolution tied to macroeconomic events (e.g., COVID-19, inflation).
- Applied chunking and BERT+MMR summarization to reduce text length by ~85%, enabling scalable analysis of 1.2M+ tokens from policy speeches.
- Achieved 90%+ topic coherence with UMAP and c-TF-IDF; uncovered a 43% decline in positive sentiment during major financial crises.
- Extracted communication patterns with predictive potential for interest rate shifts, offering strategic insights into central bank policy signaling.

CareerVista: Insights Dashboard for Data Professionals

01/2025 – 01/2025

- Identified the need for data professionals to understand industry trends in job roles, salaries, skills, and career growth to make informed career decisions.
- Analyzed a comprehensive survey dataset covering job roles, salary insights, in-demand skills, job satisfaction, and workplace challenges across industries.
- Built an interactive Power BI dashboard to visualize trends in salaries by role, experience, and location, and highlight the most valuable programming languages and tools.
- Provided actionable insights on career progression, remote work trends, and emerging technologies, helping professionals and job seekers navigate the data science landscape.

MarketVision: Amazon Revenue Analytics Dashboard

12/2023 – 01/2024

- Developed an interactive Power BI dashboard to analyze Amazon sales data, tracking key performance indicators such as year-over-year and quarter-over-quarter sales, product volumes, and customer reviews.
- Transformed publicly available Amazon datasets, building structured data models and creating calculated measures using DAX to support accurate analysis.
- Designed dynamic visualizations to display revenue trends, sales by product category and region, and review patterns over time, enabling clear insights.
- Added interactive filters and drill-down features, allowing users to explore data at multiple levels for deeper, data-driven decision-making.

CERTIFICATIONS

- Certified Implementation Specialist – Platform Analytics
- Google Data Analytics - Coursera
- Extract, Transform and Load Data in Power BI
- Python for Data Science, AI & Development

SKILLS

- Programming & Scripting:** Python (Pandas, NumPy, Scikit-learn, OpenCV), R, SQL
- Data Analysis & Visualization:** Power BI, Tableau, Data Cleaning, EDA, KPI Reporting, Data Visualization
- Machine Learning & AI:** Predictive Modeling, NLP, Deep Learning (TensorFlow, PyTorch)
- Database Management:** MySQL, PostgreSQL, SQL Server
- Cloud & Big Data:** AWS, Azure, Hadoop, Spark
- Project Management Tools:** JIRA, Agile, Scrum
- Other Tools:** GitHub, Jupyter Notebook, VS Code
- Operating Systems:** Windows, macOS, Linux

EDUCATION

Masters in Data Science, Monmouth University

09/2023 – 05/2025 | NJ, USA

Overall GPA: 3.9

Bachelor's of Engineering in Information Technology,

08/2019 – 05/2023 | Mumbai, India

K.C. College of Engineering and Management Studies and Research

Overall GPA: 3.47
